

From Crisis to Action
**How AI and Data Technologies are Closing
the Reaction Gap at “Moment Zero”**

6 NOVEMBER 2025
9:30 - 10:15, TECH X CITIES

Dr. Xavi Llorca
Chief Project Officer
at Hyds

Dr. Eduardo Quiñones
Senior Researcher at the
Barcelona Supercomputing Center

Mr. Rafael Prades
Head of Civil Protection
in Terres de l'Ebre

Session moderated by Julia Azpiroz from Pla Estratègic Metropolità de Barcelona

EXTRACT

The EXTRACT project is harnessing the power of data and testing its technology in a Personalized Evacuation Route use case in Venice that will serve to guide citizens in an urban environment through a safe route in real time.

Learn more about the project

This project has received funding from the European Union's Horizon Europe programme under grant agreement number 101093110.

CREXDATA

CREXDATA aims to develop a versatile platform for real-time critical situation management, adaptive action planning, and agile decision-making powered by extreme-scale and complex data.

Learn more about the project

This project has received funding from the European Union's Horizon Europe programme under grant agreement number 101092749.

protecció civil

Protecció Civil coordinates efforts to safeguard people, property, and the environment during major risks, disasters, and emergencies, through a network of public and private services across all levels of administration.
